

The background of the slide is a deep space scene. It features a dark blue and black sky filled with numerous bright stars of varying colors, including blue, white, and yellow. A prominent, reddish-brown planet, likely Mars, is visible on the right side of the frame, showing its characteristic surface features and atmosphere. The overall lighting is soft, highlighting the celestial bodies against the vastness of space.

Skills & Processes (Cont.)

On site PT Lab

13,000 sq. ft. Facility that sits on a 50 acre lot ready for expansion

R&M utilizes outside suppliers for testing, fabrication/welding, plating, marking, painting and all finishing. (ex Aerostar and United Plating)

Over the years we have developed unique relationships with other machine shops whom we work with. This network allows us to not turn away work and offer services other shops can't regardless of geometry/size and complication. Our goal is to be a solution to our customers diverse part procurement needs and truly be a one stop shop.

Due to the new industries we are pursuing and our commitment to quality we are pursuing AS9100 and additional CMM equipment (Faro Arm/Romer Arm) to complement our shop. R&M is also looking to add a twin spindle lathe with live tooling to accommodate parts we are currently making for the mining industry.

Customers

- Siemens
- BK Aerospace
- AC Manufacturing
- North Alabama Pipe
- Mangas Tool and Die
- Marigold Works
- Manville Electric Motors
- Precision Grinding Inc
- Southern Copper & Supply
