NASA Value - Quad Chart

Problem(s):

- Unsupported software & hardware needs to be upgraded, replaced, or integrated with secure technologies (Virtual Machines, Cloud Computing, AI Machinery)
- Cannot implement robust security requirements due legacy equipment.
- Personnel who are not familiar with DISA cybersecurity guidelines, processes, procedures, and tools.

Company Solution:

- Staffed with highly knowledgeable Cybersecurity professionals who are always prepared to overcome all challenges.
- Obtained 3-year ATO authorization for USN HWDDC program and created RMF A&A packages through eMASS workflows.
- Developed a System Lifecycle Continuous Monitoring plan to maintain network security.

Value:

- Our history of exceptional performance and outstanding CPARS make Omni2Max a valuable asset to your operations.
- Navy Qualified Validator Level III on Staff
- We provide the Best Value at Minimum Risk to effectively achieve all mission objectives.

Status of Solution

- Using our ISO 9001:2015 certified QMS process, our targeted approach enhances process development & implementation.
- Customized training that can be tailored to address potential discrepancies within the Assessment & Authorization Process and ensure all systems development and maintenance are IAW cybersecurity guidelines.

Awards/Notable Accomplishments

- CEO successfully publishes **The System is Unforgiving: Play by the Rules.** (Aug 2020)
 - Best Seller List: WSJ, USA Today, Amazon
- Graduated from SBA 8(a) program (June 2020)
- Listing in the Inc. 5000 (#2379) (Aug 2018)
- Top Secret Facility Clearance (Jan 2018)
- Recognized by the San Diego Journal as one of **San Diego's Fastest Growing Companies.** (2017)
