Other Aircraft Parts and Auxiliary Equipment Manufacturing

## Reason for Recommendation

If known, add Quality certs., past performance and previous customers in box below:

Systema currently provides products/services on several of our programs – including DARPA Gremlins and our DOTC OTA. They have been recognized within our company for providing quality products and services, in a timely manner, at a reasonable price. Specifically on the Gremlins program, they underran on their contract to the extent that the program team is able to benefit from some additional tests conducted with the remaining funding.

Administratively, they are very pleasant and easy to work with. They take limited (and only reasonable) exceptions to our terms & conditions and provide any back-up data we need to analyze price. This enables us to get them on contract and started to work in a timely manner.
