

The background of the slide is a deep space scene. It features a dark blue and black sky filled with numerous bright stars of varying colors, including white, yellow, and blue. A prominent feature is a bright, glowing nebula or galaxy structure in the upper left quadrant. On the right side, a large, reddish-brown planet, likely Mars, is partially visible, showing its textured surface and some atmospheric haze. The overall lighting is dramatic, with the stars providing a pointillist effect against the dark void.

**MSFC will require information security oversight, to include:**

- Incident response management
- Gap analysis
- Information Security awareness training
- 3<sup>rd</sup> party cybersecurity oversight

**Our products and services are tailor made to our client's environment. With over 20 years of information security experience, our team is lead by a seasoned professional and our solutions are based on industry standards, such as the NIST framework.**

**Cybersecurity is often lumped in with information technology. It is our opinion that there needs to be a separation of the two. A system of checks and balances is the foundation of a strong security posture. With that being said, IT and information security need to work hand in hand to ensure the company's objectives and goals are being met with a prudent approach.**

**Our past performance and current clients require solutions in accordance with their industry, environment and characteristics. The major aspect of our ability to mobilize and support new clients comes from the years of experience and application of cybersecurity for clients in finance, the energy sector and government contracting.**
