

The background of the slide is a deep space scene. It features a dark blue and black sky filled with numerous bright stars of varying colors, including white, yellow, and blue. A prominent feature is a large, reddish-brown planet, likely Mars, which occupies the right side of the frame. The planet's surface shows some darker, cratered areas. In the upper center, there is a faint, glowing nebula or star cluster. The overall lighting is soft, with a slight glow around the planet and stars.
