

COUNCIL HISTORY

The MPCSC was started in 2002 by Mr. David Brock, NASA Marshall Space Flight Center (MSFC) Small Business Specialist, with the assistance of several MSFC prime contractors in order to serve as an invaluable resource to preserve and promote the best interests of small businesses. It is a channel through which SBs can more effectively penetrate the Federal Government marketplace and large businesses can better achieve their SB socio-economic goals.

COUNCIL PHILOSOPHY

Our philosophy is to create an environment to promote and nurture an effective exchange of best practices and lessons learned among MSFC prime contractors, which will strengthen the support to aerospace research and development and related activities, heighten awareness of the NASA socio-economic programs and objectives, and develop a foundation for effective exchange of information throughout the MSFC prime contractor community. Council members strongly believe in the power of teamwork and believe that by working together they will make a difference!
