

The background of the slide is a deep space scene. It features a dark blue and black sky filled with numerous bright stars of varying colors, including white, yellow, and blue. A prominent feature is a large, reddish-brown planet, likely Mars, which occupies the right side of the frame. The planet's surface is detailed with craters and darker patches. In the upper center, there is a faint, glowing ringed planet, possibly Saturn. The overall lighting is soft, highlighting the textures of the planets and the density of the star field.
