

The background of the slide is a deep space scene. It features a dark blue and black sky filled with numerous bright stars of varying colors, including blue, white, and yellow. A prominent feature is a large, reddish-brown planet, likely Mars, which occupies the right side of the frame. The planet's surface is detailed with various shades of brown and orange, showing craters and geological features. In the upper center, there is a faint, glowing ringed planet, possibly Saturn. The overall lighting is soft, with a slight glow around the planets, creating a sense of depth and vastness.
