

The background of the slide is a deep space scene. It features a dark blue and black sky filled with numerous bright stars of varying colors, including white, yellow, and blue. A prominent, reddish-brown planet, likely Mars, is visible on the right side of the frame, showing its characteristic surface features and atmosphere. The overall lighting is soft, highlighting the celestial bodies against the vastness of space.

# Quality Systems

- In process of developing a system for machine tool repair in general
- Encoder system inspections: Referred after NDA of process

# Skills & Processes

- Core Skill of the company of course is repair of machine tools, both CNC and manual machine tools. The repair service includes the inspection of machines for machine down and preventive maintenance to determine course of action.
- Machine Tool Installations from rigging of the machinery, to the assembly and setup of machinery, to the run in of machinery and then the quality control check of machinery. The quality control varies from type and build of each machine tool.
- Machine Tool applications such as accessory installation and programming of logic for new systems. CNC integrations with controls to added work cells.
- Machine Tool refurbishment and rebuilding to product lines that we represent and growing the network to other line of machines for that service
